ADDENDUM NO. 1 CITY OF BISMARCK (RFP) Mobile Video System, Body Worn Cameras, Interview/Booking Room Cameras, and Digital Evidence Management Software.

Bidders/Vendors should note the following for changes and clarification to questions to information contained in the Request for Proposal:

Changes to RFP

1. In the Vendor Response to City Requirements, Subsection 4.6 (page 15) of the Proposal Requirements (Section 4) change the following:

4.6 Vendor Response to City Requirement's The City has identified in sections 3.3 through 3.7 the minimum requirements the Vendor will provide in the System. Each Vendor will provide a comprehensive response on how the Vendor and the System will meet the City's requirements in Appendix A

Clarification/Responses to Vendor Questions

1. What is the maximum number of vehicles that could be simultaneously uploading video via WiFi at the station?

A. Response: 15 vehicles uploading at one time is the most we will probably ever see.

2. In reference to RFP Section 3.3 - What is the total file size of the department's current Mobile Video System data to be imported into the proposed Digital Evidence Management Software? (Approximately how many TBs?)

A. Response: We have 25 Terabytes of video on our current Panasonic Arbitrator UEMS system.

3. We understand that in response to Section 3.3 to 3.7 requirements, we have to provide our response to questions in Appendix A of the RFP? Please confirm (RFP reference - Page 14, 15).

A. Response: Understanding the limited space, responses to the requirements in Appendix A can either be drafted in the "Vendor Response" section or supplied in a separate document as an attachment to Appendix A.

Lieutenant Cody Trom
Bismarck Police Department
